Activity/Project Description:

- > Students study traditional shellfish, crab, bay fish gathering methods. If there are tools, basketry, etc. involved, it would be ideal to offer an opportunity to view/create/use these tools and methods. Build a wier?
- Lesson should include an introduction to the basic concept of "usual and accustomed" gathering places
- Students go on an excursion to an estuary and gather foods
- ➤ Gathered foods are prepared and eaten. This could be done on the hill, or ideally at the beach using a combination of traditional and modern methods.
- Fish & Wildlife folks would be helpful and informative
- > Students document their processes in photographs and/or sketches, and assemble the images in the form of a book/slide show/web page
- History lesson on the original reservation and reductions should be previewed and discussed.

- > Students learn the shell game using pieces made by them, or older grades
- > Students can make clam shell money if the right shells are available
- > All foods lessons should include a healthy eating component
- > Lesson would compliment Science Life Cycle study
