

Acorn Game

Materials:

- * Acorns with tops
- * Markers
- * White Glue

Acorn Craft Instructions

Color the inside of each cap with colored markers. The amount of marker you use, will determine the shade the cap's inside will become. For pastels, color lightly. For vibrant shades, color the inside of the cap thoroughly. After each acorn top is colored, squirt it full of Elmer's glue before the marker dries. Allow the caps to dry overnight. The glue will have hardened into a shiny filling, and the color of the marker hidden beneath will have crept through.

Directions

The first game that can be played with the acorn caps is an autumn version of memory. Choose two caps of each color, then mix them up, colors down, in the middle of a table. Take turns trying to make a match. If you find a pair, keep it. The winner has the most pairs collected by the game's end.
